

Earn and Learn: Computer-Aided Design (CAD)

Apply to the Burns & McDonnell Electrical Designer Apprenticeship Today

About Burns & McDonnell

Burns & McDonnell is a family of companies with an unmatched team of 7,600 engineers, designers, construction professionals, architects, technologists, and scientists. Our singular mission since 1898 has been to make our clients successful. When we plan, design, permit, construct and manage projects worldwide, we do it like we own it. We deliver projects with an integrated construction and design mindset because everything is connected — design, procurement, and the sequencing of construction. We are designed to build.

Apprentice Responsibilities

The Electrical Designer Apprentice is responsible for:

- **Revising and preparing drawings** of basic components from verbal or written instructions and detailed sketches
- **Learning and following company and client drafting standards and procedures**
- **Learning the engineering and design practices** of their selected business line

Eligible students are

- Current CCC students pursuing an **Associate in Applied Science in Computer-Aided Drafting** or related program
- Some CAD coursework preferred
- 2.5 GPA and above

Apprenticeship Details:

- **Hours Per Week: 25-35** (flexible, but fixed schedule during company's core business hours, Monday-Friday 7am-6 pm)
- **Location: On-site** in Downtown Chicago Office, not a remote position
- **Apprenticeship Duration: 6 Months - 1 Year**, with eligibility for full-time employment after successful completion of program.
- **Start Date:** Early Spring 2026 (ideally mid-February)
- **Wage: \$**/hour**
