

McDonald's Cybersecurity Apprenticeship

About McDonald's Cybersecurity

McDonald's is a leading global omni-channel restaurant brand serving more than 65 million customers daily. Through its **Accelerating the Arches** strategy, the company is expanding innovation across **Delivery, Digital, and Drive Thru** to create faster and easier customer experiences. Backed by advanced technologies such as **AI, IoT, and edge computing**, McDonald's global technology teams build scalable solutions used in thousands of restaurants worldwide while fostering a diverse and inclusive workplace.

Responsibilities

- **Detect & Mitigate Threats** – Use threat intelligence, automation, and testing to strengthen security operations.
- **Manage IT & Third-Party Risk** – Assess technology and vendor risks to identify and reduce exposure.
- **Protect Sensitive Data** – Integrate data security into business processes to safeguard information.
- **Enhance Application Security** – Partner with development teams to reduce application vulnerabilities.
- **Prevent & Remediate Exploits** – Track and resolve security issues to prevent incidents.
